

Anti-Spam Research Group
IETF 72
John Levine, Chair

Agenda

- Agenda bash
- DNSBL description (Levine)
- DNSBL BCP-ish (Lewis)
- Anti-spam technique wiki
- AOB
 - ARF draft?

DNSBL Description

- Redone to be a standard with MUST, etc.
- Now has normative advice for v4, v6, domain DNSxLs

DNSBL Description

- New stuff for Ipv6
- Name syntax: hex digits like rDNS
- Forbidden entry: ::1
- Test entry: maybe ::2, debatable

DNSBL Description

- New stuff for domain BIs
- Forbidden entry: TEST
- Test entry: EXAMPLE
 - Matches current practice
- E-mail address -> localpart.domain ?

DNSBL BCP-ish

- Seems to be done
- Minor wordsmithing
 - “Don't blame DNSBL if you misuse it”
- Informational or BCP?

Technique wiki

- Growing slowly
- Any volunteers?

AOB

- ARF draft?
- Theory of assertions?
- “I send no mail” (the null assertion)
- Other?
